

ALEX MORGAN

alex.morgan@email.com | +1 (555) 482-1190 | Boston, MA

SUMMARY

Software engineer with 7 years of experience specializing in **backend** development and **Python**. Proven track record of designing and implementing **REST APIs**, working with **SQL** databases and **Docker**, and **mentoring junior engineers**. Comfortable building frontend reporting **dashboards** in **React** to support backend systems.

EXPERIENCE

Software Engineer — Northwind Retail (2019-2024)

- Developed and maintained **Python** scripts to reconcile critical nightly inventory data across databases.
- **Mentored junior engineers** on code review practices to improve overall code quality and team collaboration.
- Built internal reporting **dashboards** in **React** to visualize complex data.
- Maintained a Java/Spring **backend** order-management monolith.

Junior Developer — Bluefin Software (2017-2019)

- Implemented **REST APIs** and endpoints utilizing Node.js and Express.
- Wrote **tests** and resolved bugs to improve reliability of a legacy PHP codebase.

SKILLS

Python, SQL, Docker, React, Java, Spring, JavaScript, Node.js, Git

EDUCATION

BSc Computer Science — Northeastern University (2013-2017)
